

BUSINESS TRANSACTION ASSURANCE WITH PROGRESS ACTIONAL

ENSURE THE SUCCESS OF EVERY SINGLE IMPORTANT BUSINESS TRANSACTION

PROGRESS
SOFTWARE

Progress | Actional.

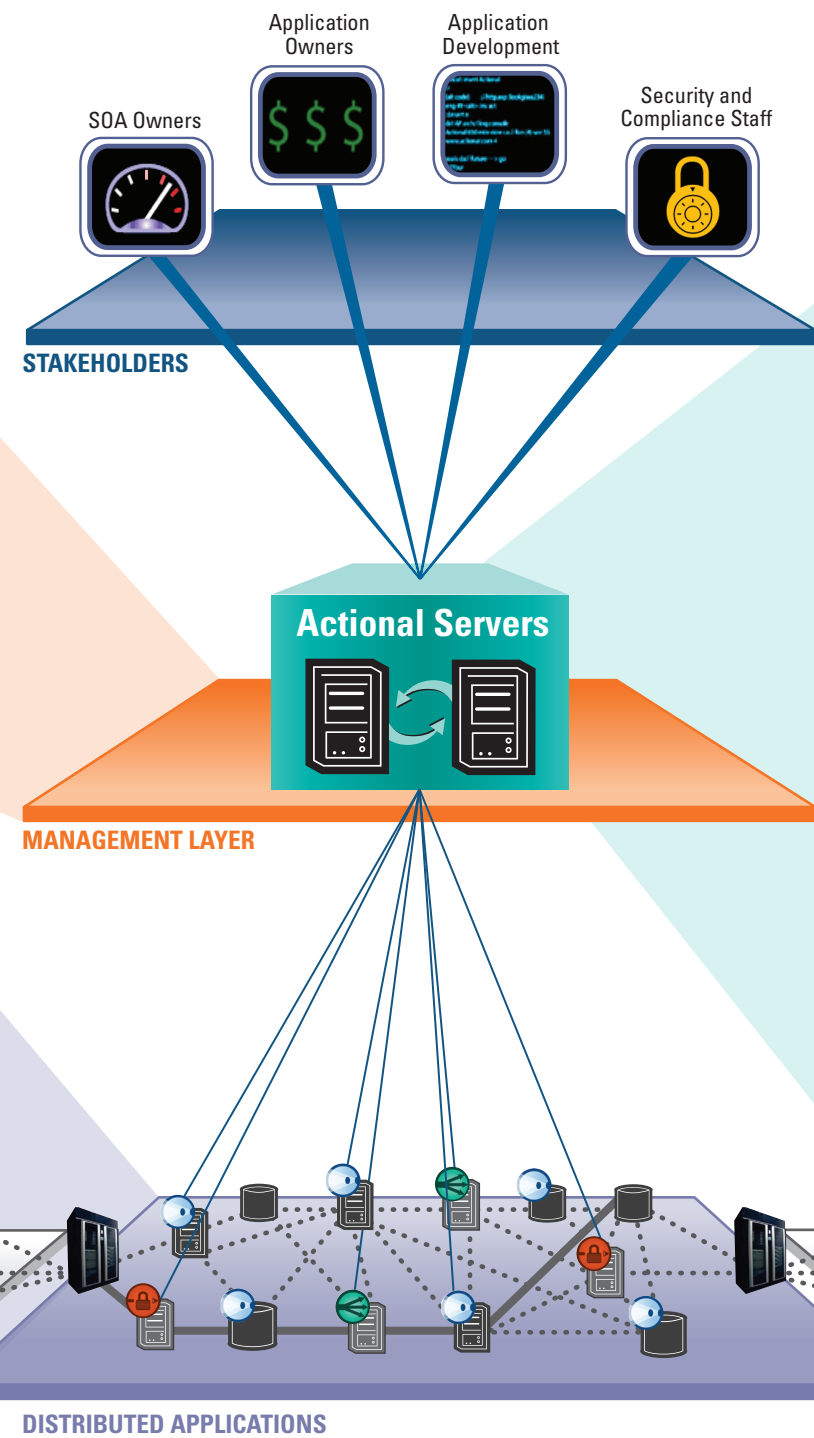

PATENTED ARCHITECTURE

TRANSACTION MANAGEMENT LAYER

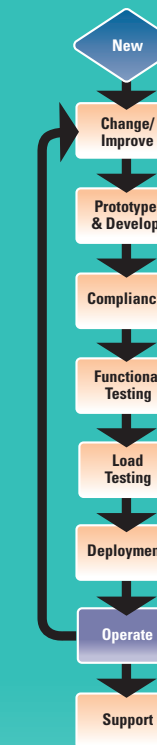

- No single point of failure or server bottlenecks
- Extremely scalable: distributed policy evaluation with central command and control
- Centralized simple & complex policy definition with consistent network enforcement
- Access to tests, policy rules—improving development productivity, service time-to-market
- Integrates pre-production & production for exception management & repair

DISTRIBUTED APPLICATIONS

- Automatic end-to-end transaction visibility across multiple protocols, platforms
- Correlates transaction flow map for root cause analysis—in a non-intrusive way
- Dynamically controls transaction flow
- Optimal performance: only 2% overhead/node

SERVICE DEVELOPMENT

SERVICE DEVELOPMENT PROCESS

- Faster, easier, earlier testing without deep XML knowledge
- Visualizes transaction flow & dependencies for service behavior assessment
- Validates, optimizes services development
- Produces higher quality services; fewer, less costly production issues

EXCEPTION MANAGEMENT

EXCEPTION MANAGEMENT PROCESS

- Manages & controls transaction flow
- Monitors traffic to minimize business interruptions proactively
- Detects, alerts on SLA, security, compliance & other policy violations
- Fast diagnosis & message repair—ensuring transactions complete
- Prevents issue recurrence

INTEGRATED PROCESS FLOW
